

Solar Pump Systems

Power any 3-phase pump with solar

Solar Solutions featuring VariSun™ 3-phase solar controllers from Sustainable Technologies are a good investment for agriculture operations looking to save money and curb emissions. Whether you're involved with crops, dairy, or livestock, Sustech can help you harness the sun for clean, economical solutions.

Comes with:

Complete modular mobile solar pump systems in a variety of sizes.

Options include:

Level controls, Flowmeter, Telemetry & Control Logic

Varisun solar power systems deliver

Reliability: Clean, off-grid 3-phase pump power 240 VAC, or 480 VAC

Flexibility: Use for irrigation, potable water, agricultural & industrial wells

Modular: Portable 3kW pods can be shipped nationwide

Economy: Get system payback within 2 years when replacing diesel

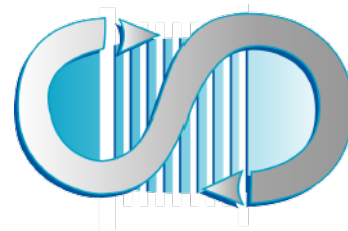

Utility: Harness direct solar, with no grid, no batteries, no pollution, no noise

Capability: One pod can power a 3HP pump, Two pods can power a 5 HP pump

Clean: Curb emissions using green power harvested from the sun

Savings: Systems eligible for 30% federal tax credit and REAP, ERP and Air District Incentives
